Research and Publications

General Orthopaedic Book, 15 articles in General Practitioner interest publications, 5 articles in peer review journals. Research and presentations on Wrist instability, Wrist denervation, Ilizarov Technique.

Current Clinical Activity

I am a full time consultant Trauma and Orthopaedic Surgeon at University Hospitals Coventry and Warwickshire. I was appointed in December 2003. My private practice includes both clinical and Medico-legal work, and my NHS work includes both Upper Limb and Paediatric Orthopaedic work. The Orthopaedic Service covers a population of approximately 600,000 with twenty-two consultants and a full complement of juniors in both clinical and research positions.

I have also been the Clinical Director for Orthopaedic Surgery for the past year.

Current Medico-Legal Activity

I have been producing medico-legal reports for over four years, concentrating mostly on personal injury and clinical negligence, and can offer evening and weekend consultations if necessary. I currently produce about 20 medical reports per month, including high value complex cases, workplace injuries and low value, RTA type, cases.

Case Split: Claimant 80% / Defendant 20%.

<i>My waiting list, as of October 2008, is less than 6 weeks.</i>
